

Coronavirus Disease 2019 (COVID-19)

Testing in U.S.

Updated March 16, 2020

This page will be updated daily at noon. Numbers close out at 4 p.m. the day before reporting.

CDC is responding to an outbreak of respiratory illness caused by a novel (new) coronavirus. The outbreak first started in Wuhan, China, but cases have been identified in a growing number of other [locations internationally](#), including [the United States](#).

Public Health Laboratory Testing for COVID-19

This map includes states and territories with one or more laboratories that have successfully verified and are currently using COVID-19 diagnostic tests. As of the evening of March 15, 84 state and local public health laboratories in 50 states and the District of Columbia have successfully verified COVID-19 diagnostic tests and are offering testing. This includes one or more PHL in 50 states plus DC and Guam.

This list is provided by the [Association of Public Health Laboratories \(APHL\)](#). Contact your [state health department](#) regarding questions about testing.

Number of specimens tested for SARS CoV-2 by CDC labs (N=4,255) and U.S. public health laboratories* (N=20,907)†

Note: As of March 12, the dates associated with the specimens tested by CDC Labs have been updated to reflect the date the specimen was received by CDC, instead of when they were collected from the patient. Use of the specimen received date better reflects when specimens became available for testing by the CDC Labs.

* Reporting public health labs are 48 state public health labs (AK, AL, AR, AZ, CA, CO, CT, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, VT, WA, WI, WV and WY), New York City, USAF, and 9 California counties.

† Non-respiratory specimens were excluded. For state public health labs, the date represents the date of sample collection, if available, or the date the specimen was tested. For CDC labs, the date represents the date specimen was received at CDC. Results reported as of 4:00 pm ET on March 14 were included. Data are preliminary and may change as more reports are received.

‡ Data during this period are incomplete because of the lag in time between when specimens are accessioned, testing is performed, and results are reported.
